

Let's play: Connect the dots to create a building!

Before we start the project, we use 3D models on our computers to see what the building will look like and figure out any issues before we put shovels in the ground. Help Emma figure out what this building will be when it's finished!

Did you know the hotel at the Seminole Hard Rock Hotel & Casino in Hollywood, FL, is the first guitar-shaped building?

It took three years to create it and it stands 450 feet tall!
